What is AXON body?

TASER's AXON body is an ultra-durable on-officer camera designed to balance both simplicity and performance. AXON body provides agencies with a core unibody design for easy deployment. A 130-degree wide-angle lens, multiple on-body mounting options, a full shift buffer, and easy deployment provide agencies with a single button solution to recording digital evidence.

Capture More...

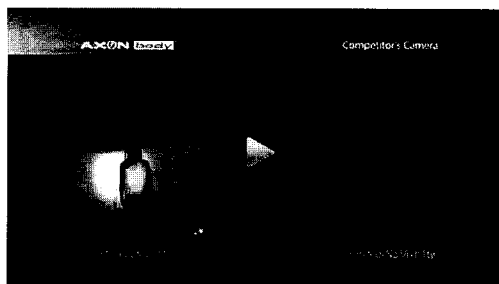

With a 130° lens providing an even greater field of view, the AXON body camera captures more than any other body camera available.

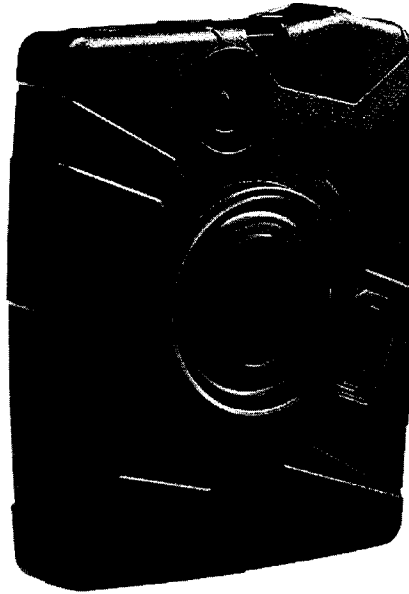

...Even in the Dark

The Retina Low-Light technology gives the AXON body unparalleled low-light capabilities that you can see for yourself.

Multiple mounting options

There is no "one-size-fits-all" for officers. That's why AXON body uses multiple mounting options to securely attach to the officers uniform.

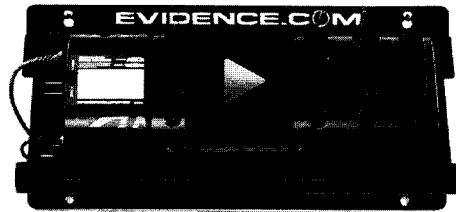

- Button Shirt
- Zipper Shirt
- Utility Belt
- Uniform Shirt Pockets

Dock and Go

Automatically upload your videos into EVIDENCE.com.

Spend more time on patrol and less time at a computer.

The next day your unit is charged and ready to go.

What to do with the data?

With AXON body, the agency chooses what to do with the data. You can download the files locally to your own data storage system**, or upload to EVIDENCE.com, TASER's hosted digital evidence management solution. With EVIDENCE.com, you can easily store, retrieve and share your digital evidence... all from one secure location.

TASER's Cloud Panel at the 2012 IACP

IACP Cloud Panel Research Paper - Summary

IACP Cloud Panel Research Paper

Cordless Simplicity

130° lens provides a greater field of view letting officers capture more of what they experienced.

Pre-event video buffer yields the greatest reduction in complaints and lawsuits when actions leading up to the incidents are recorded.

Full shift battery lasts 12 hours, ensuring every incident is captured.

Low light recording best shows what the human eye actually sees.

Improves behavior of all parties during police interaction.

Save Money

U.S. law enforcement spends approximately \$2 billion each year to resolve claims. Using on-officer cameras can help back up your agencies actions and reduce the cost of resolving complaints.

Reduce Complaints

Studies have shown that using cameras can reduce complaints by over 80%. Another UK study showed a 100% reduction in complaints with the adoption of on-officer cameras.

AXON body Features

Full shift video buffer- You never know when the action will happen

Reach back 30 seconds into the past and retrieve the events leading up to the event. When your honor is on the line, don't let a 3-second cell phone clip define you. AXON body has a 12+ hour battery that allows for full shift video buffer.

Retina Low Light – Because most critical events happen at night

With Retina Low-Light we've used advanced imaging technology to increase the camera's light sensitivity, allowing each pixel to capture light comparable to the human retina. We've highly customized this capability to give our users spectacular low light imaging that was

designed to match the human eye. Retina Low-Light – there’s nothing else like it.

Simply dock and go... It’s that easy with automated workflows

Spend more time on patrol, not sitting at a computer uploading files. At the end of your shift, simply dock your AXON body in the EVIDENCE.com Dock, where the camera automatically uploads to the EVIDENCE.com website. The next day, your unit is charged and ready to go.

At the end of a long shift you don’t want sit down and transfer videos. With AXON body, simply dock and go.

EVIDENCE.COM cloud computing – All of your digital evidence in one place

AXON body technology effortlessly connects with EVIDENCE.COM services to provide an “always-on,” instantly available, infinitely scalable system that is monitored 24-7 to secure your digital evidence.
